DETAILED ACTION

Introduction

- 1. The Examiner has carefully considered Applicants' amendments and remarks filed on 2/10/2006. Applicants' amendments to claims 1,10 and 11, and new claims 13-15 have been entered.
- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Rejections not maintained are withdrawn. In particular, Applicant's amendment overcomes the rejection under 35 U.S.C. 112, first paragraph (Office action mailed 11/8/2005, section 6).

Election/Restrictions

4. Newly submitted claims 14 and 15 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Both claims 14 and 15 recite "... support (1), formed by a textile, nonwoven resinimpregnated polyethylene fiber material ...", in contrast to claim 5, which recites "... the nonwoven material is a fiber material selected from the group consisting of viscose fibers, polyester fibers, propylene fibers, and a fiber blend of at least two of the aforementioned fiber materials." Clearly, polyethylene in new claims 14 and 15 is distinct from the species of fiber materials in claim 5.

Art Unit: 1771

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 14 and 15 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Rejections Based on Prior Art

5. Claims 1-3, 5-8, 10, 12 and 13 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Mamish (US 5227225), generally as set forth in section 4 of Office action dated 4/14/2005, together with the following additional reasoning and response to argument.

First, the Examiner repeats the relied upon prior art as follows: Mamish's invention is directed to methods for preparing masking tapes by coating a thin layer of a polyolefinic material onto a lightweight nonwoven cloth and then applying a layer of adhesive onto the opposed surface of the nonwoven cloth (Abstract). Mamish teaches that the coated polyolefinic backing layer will both coat the surface of the cloth and invade its interstices, so that the nonwoven cloth may be said to be "embedded" (impregnated) (column 1, lines 56-61). Additionally, the polyolefin backing layer of the masking tape acts as a sealant to the discontinuous nonwoven surface and serves as a barrier layer against adhesive migration (column 1, lines 65-67).

For independent claims 1, 10 and 13, with respect to newly added limitation reciting, *inter alia*, "... imbued with a thermoplastic resin ... preventing penetration of the

Application/Control Number: 09/755,884 Page 4

Art Unit: 1771

adhesive coating through the nonwoven fiber material", the Examiner notes that Mamish expressly teaches that the polyolefin backing layer of the masking tape acts as a sealant to the discontinuous nonwoven surface and serves as a barrier layer against adhesive migration, which reads on the newly added limitation as claimed.

For claim 12, with respect to the product-by-process limitation "...imbued by dipping or spraying with the thermoplastic resin", the Examiner notes that since the method limitation has not been shown on the record to produce a patentably distinct article, the formed articles are rendered *prima facie* obvious. It should be noted that product-by-process claims are nonetheless product claims, and to be limiting in a product claim, a process limitation must be evidenced as effecting the structure or chemistry of the resultant product over the prior art. Further, the burden of proof for this showing is on Applicant after the Examiner presents an otherwise prima facie rejection. See MPEP § 2113.

For claim 13, since it contains the same scope of elements and limitations as claims 1-3, 5-8, 10 and 12, it is also rejected for the reasons as set forth above.

6. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mamish (US 5227225) in view of Hansen et al. (US 4133731), generally as set forth in section 5 of Office action dated 4/14/2005, together with the additional reasoning as set forth above.

Allowable Subject Matter

7. Claim 11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

More particularly, Mamish lacks a teaching of a sealing layer of acrylate resins or polyurethane resins. Further, a search yields JP 08-033673 reference teaching an adhesive film having a laminated waterproof film selected from polyurethane, polyester elastomer, porous polyolefin ad porous polyvinyl chloride. However, JP '673 lacks a teaching of impregnated structure.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor S. Chang whose telephone number is 571-272-1474. The examiner can normally be reached on 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel H. Morris can be reached on 571-272-1478. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
